

Future strategy for the new entity ADL Bionatur Solutions

Media advisory

Jerez, Spain, 25 May 2018.- ADL Bionatur Solutions, controlled by the Black Toro Capital (BTC) investment fund, is the new company resulting from the merger of ADL Biopharma (formerly, Antibioticos de León) and the Jerez-based company Bionaturis.

This merger supports the Spanish biotechnology research market by bringing together in a single entity the specialisation in premium products and services applied to animal health developed by Bionaturis with the industrial production by fermentation and manufacturing capacity of sterile and oral APIs (active pharmaceutical ingredients) owned by ADL Biopharma.

The result of this union is a new benchmark in fermentation and high value-added biotechnology solutions in Europe. The new pharmaceutical company is named ADL Bionatur Solutions and its shares are listed on the MAB, Spain's alternative investment market (Mercado Alternativo Bursátil).

To explain the details of this agreement and the business prospects opened up for both companies, next **Tuesday, May 29, 2018** a media briefing will be held at the **CONFEDERACIÓN DE EMPRESARIOS Y CÁMARA DE COMERCIO E INDUSTRIA DE JEREZ at 10.30 h**. The presentation will be given by **Pilar de la Huerta**, the new CEO of ADL Bionatur Solutions, and **Víctor Infante**, CEO of the Animal Health Division.
